**ECP2 IMPROVEMENT AND  
UPGRADE OF EUIPN TOOLS**

Structured around a project-based approach, **European Cooperation** has a portfolio of projects consisting of both **European Cooperation Projects (ECPs)** set out during the previous strategic plan, and a series of new projects adopted in the framework of the SP2025. Each ECP contains at least one project, which is supported by a working group made up of EU national and regional IP office experts, users, and, where relevant, experts from international organisations.

Under this approach, the **ECP2** aims to **enhance and develop the operational Cooperation Fund tools** with new functionalities. The **use of the tools and services** developed during the lifetime of the previous strategic plans is still increasing, and these projects aim to **fully maximise their potential**. These projects include major improvements to the Back Office and Front Office, as well as TMview and DesignView.

**EXPECTED BENEFITS**

- Improved operational efficiency in IPOs
- Enhanced user satisfaction with existing European Union Intellectual Property Network (EUIPN) tools
- Increased usage of EUIPN tools
- Further convergence of EUIPN tools achieved
