

**GOAL 3.2
EVOLVING WITH THE DIGITAL
ERA**

PROJECT MANAGER

Javier Blanco

TIMELINE

January 2021 to March 2025

INVESTMENT

EUR 5 051 000

STAFF INVOLVED

3.48 Full-time Equivalents (FTEs)

MOST IMPACTED CAPITAL¹

Organisational

MOST IMPACTED STAKEHOLDER

Users

¹ As part of an integrated thinking approach, in 2016 the Office adopted the five capitals value creation model (human, organisational, relational, economic & environmental).

IMPLEMENTATION OF CLOUD STRATEGY

The Office must continue to invest in the **modernisation of its digital infrastructure**. To keep up with innovation, obsolete services must be phased out. Renewal of network infrastructure, telephony, refactoring of existing applications into cloud-ready architecture or implementation of a storage strategy are a few examples of this crucial modernisation actions.

To do so, this project aims to increase the **resilience of EUIPO platforms**; to implement **automated cloud deployment solutions**; to maintain all **critical information and data** duplicated onsite; to **remove dependencies** on individual data centres; and to increase coverage of **critical business support systems** in the cloud.

EXPECTED BENEFITS

- Increased availability of Office tools
- Increased EUIPO website availability
- Full digitalisation and modernisation of Office procedures
